CÔNG TY CỔ PHẦN COREFUND

Innovation Investment Fund

Corporate Introduction Document (High-Level Scope)

Release version: April 2026

Website: corefund.io.vn

CORE FUND

INNOVATION INVESTMENT FUND

Opening Statement

Core Fund operates with an innovation-oriented investment direction, focusing on SMEs, innovative startups, and enterprises pursuing digital transformation and technology-enabled growth.

Company positioning

Core Fund builds a corporate information platform with clear structure, practical clarity, and legally cautious communication, supporting disciplined enterprise engagement.

Operating mindset

Each opportunity is reviewed on documentation quality, practical fit with operating orientation, and communication readiness in the relevant working stage.

Disclosure boundary

This profile is published for high-level corporate introduction. More detailed content may be released in future phases when appropriate for disclosure scope.

INNOVATION INVESTMENT FUND

Company Overview

Company Overview

Core Fund prioritizes long-term development quality, practical execution capability, and responsible communication.

Primary focus

SMEs, innovative startups, and enterprises with clear digital transformation and science-and-technology direction.

How engagement is organized

Structured intake, scope-based screening, clarification exchange, and internal review through defined process steps.

Core collaboration values

- Transparent information sharing within suitable scope.
- Process discipline for consistent review quality.
- Respect for each enterprise's stage, context, and model characteristics.
- Innovation orientation connected to measurable operational value.

Cautious publication principle

Core Fund does not make claims beyond published data scope. Detailed information is updated in suitable phases to preserve consistency across official communication channels.

Operating Model

High-Level Operating Model

The workflow is designed to support consistency, transparency, and practical communication quality.

1. Initial intake

Receive enterprise information through official channels and define the suitable discussion scope.

2. Preliminary screening

Review relevance against current orientation and focus categories.

3. Clarification exchange

Discuss business model, operational context, key data points, and development direction.

4. Internal process review

Consolidate information and evaluate internally using appropriate criteria.

5. Next-step feedback when suitable

Feedback depends on documentation quality, practical fit, and review context at that time.

Information intake does not imply automatic selection. Every opportunity is reviewed case by case, based on practical fit and documentation quality.

INNOVATION INVESTMENT FUND

Investment Focus

Investment and Sector Focus

Core Fund applies a selective and context-aware approach to sectors, with emphasis on practical innovation value.

Technology and innovation categories

Focus on enterprise models that use technology to improve execution quality, market responsiveness, and operating efficiency.

Digital transformation enterprises

Priority to enterprises building credible roadmaps for digital governance, data

systems, and operational upgrades.

Traditional sector models with innovation direction

Production, commerce, services, construction, and hybrid models are considered when technology adoption and innovation execution are credibly integrated into growth direction.

Suitability determination principles

- Suitability is not assessed by sector label alone.
- Documentation quality and execution capability are central to initial review.
- Legal context, operations, market potential, and innovation direction are considered together.
- Focus priorities may be refined over time with development roadmap updates.

Core Fund - Company Profile (EN) 04

INNOVATION INVESTMENT FUND

Priority Sectors

Priority Sector Categories

Priority categories indicate current orientation and may evolve over time with publication updates.

Fintech

Technology-enabled financial models with practical service improvement and

operational clarity.

Proptech

Digital solutions for real estate and asset operations with measurable execution context.

Healthtech

Technology-enabled healthcare models emphasizing service quality and deployable operations.

Edtech

Education technology models focused on practical learning outcomes and scalable delivery.

Logistics

Supply-chain and logistics optimization models supported by technology integration.

SaaS/B2B software

Enterprise software platforms improving process quality, governance, and operating productivity.

Core Fund - Company Profile (EN) 05

CORE FUND

INNOVATION INVESTMENT FUND

Priority Sectors

Priority Sector Categories (continued)

AI / Automation

AI and automation use cases that demonstrate practical operational value.

Digital commerce

Digital commerce models and infrastructure supporting multi-channel operations.

SME digital transformation

Solutions helping SMEs standardize process quality and management capability.

Production, commerce, services, construction, hybrid models

Considered when innovation and technology are credibly embedded in the growth model.

Priority category notes

- Priority categories are directional, not absolute inclusion lists.
- Each enterprise is reviewed on case-specific documentation and practical fit.
- No sector is automatically selected without sufficient baseline information quality.

Core Fund - Company Profile (EN) 06

CORE FUND

INNOVATION INVESTMENT FUND

Enterprise Fit Criteria

The criteria framework supports intake, screening, and clarification in a structured way.

Legal clarity and document transparency

Clear legal baseline and information that can be reasonably cross-checked.

Business model quality

Value creation logic, product or service structure, and customer context are clearly stated.

Governance and operations

Execution discipline, process quality, and consistency under scaling pressure.

Market potential

Target market rationale and realistic expansion context supported by relevant data.

Innovation and digital direction

Clear roadmap for technology adoption or process innovation in business operations.

Review coordination readiness

Suitable communication focal point and structured responsiveness in working stages.

CORE FUND

INNOVATION INVESTMENT FUND

Strategic Ecosystem

Strategic Ecosystem Context

Core Fund publishes ecosystem references within currently available scope to support practical technology and operational context.

CoreTech (coretech.io.vn)

Related technology platform contributing perspective on digital enablement and implementation context.

TechnologyDigital enablement

Core FinTech (corefintech.vn)

Related financial technology platform supporting perspective on digital service infrastructure.

FinTechDigital service

Ecosystem disclosure principles

- Only currently confirmed ecosystem references are published.
- No expanded partner list or logos are shown without publication confirmation.
- Partner content is presented in restrained corporate style focused on

collaboration value.
